

DAS PARTYPROGRAMME

FINE FOR LONG STUDYING

DAS believes the long-study fine will be the **noose** for **student activism**. Therefore, DAS will make every effort at the **EB** and at the **national level** to counter this development.

AMBITION

DAS advocates for

- more room for **own initiatives**;
- encouraging **personal development**;
- continuing to stress the **importance** of **student boards** and **teams**;
- maintaining **FOBOS** for extracurricular activities, despite financial pressure from the UT.

ONDERWIJSKWALITEIT

DAS believes it is important that the **validity of marks** at UT is drastically extended. This helps the student and reduces the review costs for UT. In addition, **TOM 2.0** should be **evaluated** and education evaluation should be more **effective**.

INCLUSIVITY

- DAS believes it is essential that **all associations** are welcome during the Kick-In.
- DAS believes that **integration** is more than just **language policy**.
- DAS believes UT should **facilitate** the learning of the **Dutch language** to students and staff.

PARTICIPATION

DAS aims to expand its **involvement** at **national level** by being closely involved in **student representation** in The Hague, at **faculty level** by also being represented in **faculty councils** at the UT

STUDENT WELL-BEING

The queue at the **student psychologist's** office is **far too long**. Therefore, DAS advocates for an **additional student psychologist** so that all students can be helped.

FACILITIES

UT is out of its depth and facilities are lagging behind. Therefore, DAS advocates for **more space** for **study places**, but also for more space for sports and cultural associations, such as an additional **gymnasium** and a new dance hall.

RECENT SUCCESSES

- **FOBOS budget** extended by **€65,000**.
- More focus on **personal development** alongside your studies on the UT website.
- **Activism recognition** extended to committees.
