

DAS PARTY PROGRAMME

Quality of education

Education quality is and remains the highest priority for DAS. Quality education is the foundation of a successful student experience. That's why we are committed to well-coordinated and coherent education, more effective evaluations, better guidance, and clear communication.

Ambition

Student development goes beyond academics. DAS advocates for more space and support for extracurricular activities, equal opportunities for all students, and better visibility of options such as the board minor and start-up support. **We ensure that the new Student Support Fund (STOF) continues to encourage active students, not hinder them.**

Participation

DAS believes it is important that students are involved in decisions that affect them. Therefore, **DAS will work to raise student awareness of their participation rights and provide support in this area.**

Political developments

As DAS, we will closely monitor political developments in the coming year, urging the UT to oppose certain measures, such as budget cuts to sports and culture. **Internationalization should also be preserved** wherever it contributes to a strong and inclusive campus.

Student wellbeing

Student life can be very demanding, especially now with high academic pressure and the financial situation many students face. DAS believes that the UT should support students as best as possible. That's why **DAS advocates for more student psychologists and improved mental health support.** DAS also strives for better quality of care at the campus general practitioner, for the well-being of students.

Facilities

Over the past year, the costs of participating in sports and cultural activities at the University of Twente have increased significantly. As DAS, we find this concerning, as these activities play an important role in students' well-being and personal development. Therefore, **DAS advocates that the UT takes active and appropriate measures to ensure that sports and culture remain accessible and affordable for all students in the future.**

Inclusivity

The UT is home to many nationalities and cultures, which makes it a beautiful and unique place! DAS believes that, as a result, the **integration of the English language should continue** in an appropriate way, for both staff and students.
